

ICELAND — 1873-1944

This set of album pages provides spaces for every stamp and souvenir sheet issued by Iceland, from the first issues of 1873 through the declaration of the Republic of Iceland in 1944.

Scott Publishing Company and Facit Fölags AB will not give or sell me a license to use their catalog numbers; thus, you find no catalog numbers in the spaces. But it's a simple matter for you to pencil catalog numbers in the spaces if you want. If a set crossed the line between the kingdom and the republic, I've included the entire set. At the back of this file are blank pages with headers for every issue. These are for specialists who want to include shades, varieties, booklet panes, multiples, covers or whatever.

With the exception of the officials (which are at the back), I've ordered the pages in date of issue order. So you'll find regular issues, semi-postals and airmails all combined. But in no case (excepting the triangular airmail issues included with the 1930 Parliament Millenary, 1930 Parliament Millenary Officials and the 1937 King Christian X's 25th anniversary issues) have I mixed different stamp types on the same page, so you can rearrange the pages into Scott-type order if you want. Pages 2 through 45 are the album pages; pages 46 through 87 are the blank pages with issue headers. Pages 38 and 39 are duplicate pages for the same issues. Facit and other European catalogs have issued major catalog numbers for the perforated 12¾ 5 aurar brown and 20 aurar green Officials, while Scott has not. Neither of these stamps was regularly issued; nearly all of the supply was overprinted "Í GILDI" with a few unoverprinted examples escaping via the back door.

I've included color scans of just a few stamps at 90% size. These will, obviously, print as black-and-white halftones if you use a laser printer. If you want the same pages with scans for every face-different stamp, please select the "with scans" option from the album pages web page.

I designed these album pages to accommodate bottom-sealed mounts; thus, the spaces are more generous than what one usually finds. Obviously, you will want to adjust your Adobe Reader and printer so you get pages in exact size. To check calibration, the line at the bottom of this page is exactly 100 millimeters long. These pages are 8½ x 11 inches. I do not intend to produce free album pages in European or other sizes.

These pages are designed to slip into standard page protectors, but I provided enough room at the left if you want to punch them for a standard three-ring binder. I encourage you to print these out on card stock, if your printer can handle it. One example is Wausau Papers Bright White Acid-Free 65 pound Card Stock, which is available at most national chain office supply stores and is quite inexpensive. I also encourage you to use mounts: pages printed via inkjet printer will transfer printing to the backs of stamps in humid weather, and laser printed pages will do the same if there's any pressure at all placed on the pages.

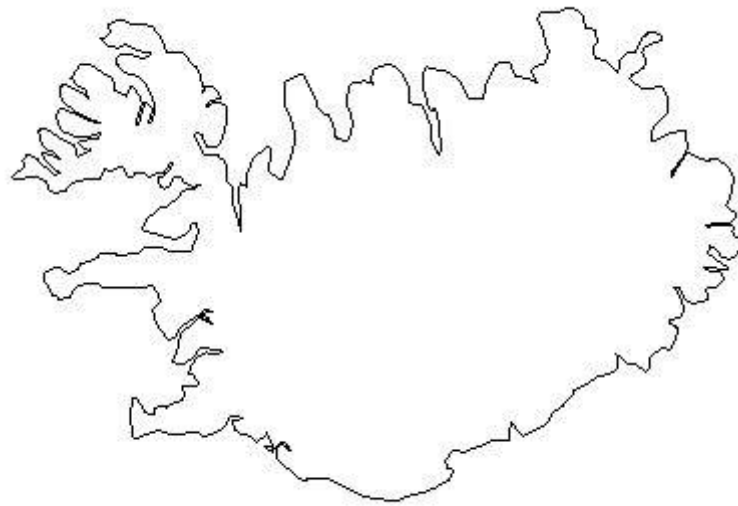

WHY FREE ALBUM PAGES? I have two reasons for making these pages available for free:

1) I hope you will peruse my listings for stamps to inhabit the spaces. So I've included my domain name at the lower left of every page in unobtrusively tiny type.

2) I will typeset album pages to your specifications in this identical format. I charge \$25.00 per hour with a minimum charge of \$15.00 per order. It takes me between 15 minutes and an hour to do a page, less if I have a batch of pages to do all at once. For examples, it took me about 15 minutes to lay out the 1873 page and 40 minutes to lay out the 1930 Millenary of Icelandic Parliament page. Pages for covers take 10 to 30 minutes, depending on how many covers you want on the page and the amount of verbiage below the covers. Please contact me for further details.
